

EVERY BREATH YOU TAKE - words Jackie Shears (with Alison Pittard)

Every breath you take
Every move you make
Every time you ache
Every sound you make
We watch over you

Every single day
When you're in real pain
When you feel afraid
Every night you stay
We watch over you

Oh don't you fear
ICU is here
When your poor heart aches
And you're life's at stake

When we ventilate
Then your lungs inflate
When you're feeling scared
And you can't be heard
We watch over you

Since this bug we've been here without a fail
Finding treatments and care to save the day
Your family says that it's you they can't replace
They feel so sad and they long for your embrace
Keep your masks on people, people (1.44)
pleeeeeease

Every breath you take
Every move you make
Every time you ache
Every sound you make
When your life's at stake
We watch over you

Oh don't you fear
ICU is here
When your poor heart aches
And you're life's at stake

Every breath you take
Every move you make
Every time you ache
Every sound you make
We watch over you
Every sound you make
Every breath you take
We watch over you

(Every single day)
(Every night you stay),
(When you're in real pain)

We watch over you

(We resuscitate)
(And we ventilate)
(Let your lungs inflate)

We watch over you

(Covid isn't fake)
(Wear a mask please mate)
(Book to vaccinate)

We watch over you

(Every single day)
(Every night you stay),
(When you're in real pain)

We watch over you

(We resuscitate)
(And we ventilate)
(Let your lungs inflate)

We watch over you

(Covid isn't fake)
(Wear a mask please mate)
(Book to vaccinate)

We watch over you

(Every single day)
(Every night you stay),
(When you're in real pain)

We watch over you

(We resuscitate)
(And we ventilate)
(Let your lungs inflate)

We watch over you
